
New Product Bulletin – New Print & On-line Catalog

March, 2005

We are pleased to unveil our completely revamped catalogs. The *Light Fixture and Lamp Parts* catalog is now comprised of 10 sections, all of which contain product photos making it easier to visualize these decorative components. The *Recessed (Downlight) Parts* catalog contains 12 sections, most of which have compatibility charts to help you come up with part combinations that best suit your applications. Extensive isometric views make visualizing the highly functional parts a snap.

Best of all, our new on-line recessed catalog with search capabilities and 3-D image viewing, allows you to dynamically spin the part and zoom in on any feature! Catalog pages may also be viewed on-line in order to obtain overall dimensional information. Once you have found the items you are looking for, add them to your shopping cart with the quantity you would like quoted. As soon as you check out, you will receive a friendly e-mail confirming the details of your inquiry and that you will be contacted within a few days with your quotation.

Visit Tripar's catalog page at www.tripar-inc.com or contact us at sales@tripar-inc.com , or 514-648-7471 & 800-361-0983.
